

Mouse B7-H5-mlgG2a

Cat No.: 03-04-0042

Product Name: Mouse B7-H5-mlgG2a

Description: Recent identified B7/CD28 family member B7 homologue 5

(B7-H5), was identified as a specific ligand for CD28H.

B7-H5 is constitutively expressed on macrophages and

could be induced on dendritic cells. The B7-H5/CD28H

interaction selectively costimulates human T-cell growth and

cytokine production via an AKT-dependent signalling

cascade.

Type: Protein

Property: Protein

Source: HEK293

Genbank No.: Q9D659 (aa.33-191)

Applications: WB,ELISA,Immunogen

Purity: >95%

Storage: Store at -80°C, Avoid freeze / thaw cycle.

Limitation: For research use only, not for use in diagnostic procedures.
