

Mouse PD-1-mlgG2a

Cat No.: 03-04-0084

Product Name: Mouse PD-1-mlgG2a

Description: Programmed cell death protein 1, also known as PD-1 and

CD279, functions as an immune checkpoint, plays an

important role in down regulating the immune system by

preventing the activation of T-cells, which in turn reduces

autoimmunity and promotes self-tolerance, by interaction

with its ligands PD-L1/PD-L2 on APC/Treg (or cancer) cells.

The inhibitory effect of PD-1 is accomplished through a dual

mechanism of promoting apoptosis (programmed cell death)

in antigen specific T-cells in lymph nodes while

simultaneously reducing apoptosis in regulatory T cells

(suppressor T cells).

Type: Protein

Property: Protein

Source: HEK293

Genbank No.: Q02242 (aa.21-169)

Applications: WB,ELISA,Immunogen

Purity: >95%

Storage: Store at -80°C, Avoid freeze / thaw cycle.

Limitation: For research use only, not for use in diagnostic procedures.
