| Cat No.: | 03-01-0105 |
| Product Name: | Human CD7-hlgG4 |
| Description: | CD7, a member of the immunoglobulin superfamily, is expressed on thymocytes and mature T cells. It plays an essential role in T-cell interactions and also in T-cell/B-cell interaction during early lymphoid development. CD7 can be aberrantly expressed in refractory anaemia with excess blasts (RAEB) and may confer a worse prognosis. Also, a lack of CD7 expression could insinuate mycosis fungoides (MF) or Sezary syndrome (SS). |
| Type: | Protein |
| Property: | Recombinant Protein |
| Source: | HEK293 |
