| Product Name: | Human CD27(TNFRSF7)                                                                                                                                                                                                                                                                           |
| Description:  | CD27, a member of the TNF-receptor superfamily, is the receptor for CD70/CD27L. CD27/CD27L interaction plays a key role in regulating B-cell activation and immunoglobulin synthesis. May also play a role in survival of activated T-cells, and in apoptosis through association with SIVA1. |
| Type:         | Protein                                                                                                                                                                                                                                                                                       |
| Property:     | Recombinant Protein                                                                                                                                                                                                                                                                           |
| Source:       | HEK293                                                                                                                                                                                                                                                                                        |
| Genbank No.:  | P26842 ( aa.20-191)                                                                                                                                                                                                                                                                           |
| Applications: | ELISA, WB, Immunogen                                                                                                                                                                                                                                                                          |
| Formulation:  | Each vial contains 50ug purified protein(1mg/ml) in PBS(pH7.4).                                                                                                                                                                                                                               |
| Purity:       | >95%                                                                                                                                                                                                                                                                                          |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                                                                                                                                                                                                                                                    |
| Limitation:   | For research use only, not for use in diagnostic procedures.                                                                                                                                                                                                                                  |
