Monkey CD27-hIgG4

Cat No.:	03-01-0300
Product Name:	Monkey CD27-hIgG4
Description:	CD27, a member of the TNF-receptor superfamily, is the receptor for CD70/CD27L. CD27/CD27L interation plays a key role in regulating B-cell activation and immunoglobulin synthesis.May also play a role in survival of activated T-cells, and in apoptosis through association with SIVA1.
Type:	Protein
Property:	Recombinant Protein
Source:	HEK293
Genbank No.:	XP_001104337
Applications:	ELISA, WB, Immunogen
Formulation:	Each vial contains 50ug purified protein(1mg/ml) in PBS(pH7.4).
Purity:	>95%
Storage:	Store at -80°C, Avoid freeze / thaw cycle.
Limitation:	For research use only, not for use in diagnostic procedures.
