| Cat No.: | 03-01-0343 |
| Product Name: | Monkey CD32b(FcR2b) |
| Description: | CD32b, also known as FCGR2B, is the low affinity immunoglobulin gamma Fc region receptor for the Fc region of complexed or aggregated immunoglobulins gamma. Involved in a variety of effector and regulatory functions such as phagocytosis of immune complexes and modulation of antibody production by B-cells. Binding to this receptor results in down-modulation of previous state of cell activation triggered via antigen receptors on B-cells (BCR), T-cells (TCR) or via another Fc receptor. Isoform IIB1 fails to mediate endocytosis or phagocytosis. Isoform IIB2 does not trigger phagocytosis. |
