|---------------|-------------------------------------------------------------------|
| Cat No.:      | 01-02-0464                                                        |
| Type:         | Recombinant Protein                                               |
| Source:       | HEK293                                                            |
| Applications: | WB standard, antibody ELISA, immunogen, etc                       |
| Formulation:  | Each vial contains 100 ug purified protein(1mg/ml) in PBS(pH7.4). |
| Purity:       | >95%                                                              |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                        |
| Limitation:   | For research use only, not for use in diagnostic procedures.      |
