

## Pp65 (UL83)(CMV)

|               |                                                                          |
|---------------|--------------------------------------------------------------------------|
| Cat No.:      | 01-11-0025                                                               |
| Product Name: | Pp65 (UL83)(CMV)                                                         |
| Description:  | Pp65 (UL83)(CMV)                                                         |
| Type:         | Protein                                                                  |
| Property:     | C-terminal 6xHis tagged Pp65 (UL83) immunodominant region (a.a. 297-510) |
| Source:       | E.coli                                                                   |
| Applications: | WB standard, Ab ELISA, immunogen, etc.                                   |
| Formulation:  | Each vial contains 100 ug purified protein(1mg/ml) in PBS(pH7.4).        |
| Purity:       | >95%                                                                     |
| Storage:      | Store at -80°C, Avoid freeze / thaw cycle.                               |
| Limitation:   | For research use only, not for use in diagnostic procedures.             |
