

## Anti-gC (HSV-1)

|               |                                                                                              |
|---------------|----------------------------------------------------------------------------------------------|
| Cat No.:      | 01-11-0103                                                                                   |
| Product Name: | Anti-gC (HSV-1)                                                                              |
| Description:  | Anti-gC (HSV-1)                                                                              |
| Type:         | IgG1                                                                                         |
| Property:     | Mouse monoclonal Antibody                                                                    |
| Source:       | Mouse                                                                                        |
| Applications: | ELISA, IP, IF                                                                                |
| Formulation:  | Each vial contains 100 ug purified IgG in 100 ul PBS(1mg/ml) with 40% glycerol.              |
| Immunogen:    | DNA vaccine expressing ectodomain of HSV-1 gC protein (Genebank No. ADD60042) (a.a. 25-427). |
| Specificity:  | reacts with gC of HSV-1, weakly with gC from HSV-2.                                          |
| Purity:       | >95%                                                                                         |
| Storage:      | Store at -20°C, Avoid freeze / thaw cycle.                                                   |
| Limitation:   | For research use only, not for use in diagnostic procedures.                                 |
