Product Name:	Human 4-1BBL
Description:	4-1BBL is a member of TNF superfamily cytokine that binds to 4-1BB/CD137/TNFRSF9.4-1BB Ligand (4-1BBL)is a type II transmembrane protein that plays an important role in immune response activation. 4-1BB Ligand is expressed by activated B cells, monocytes, macrophages, dendritic cells (DC), T cells, lymphoma and multiple myeloma cells, hematopoietic stem cells, early myeloid progenitors, neurons, and astrocytes.It induces the proliferation of activated peripheral blood T-cells, and may have a role in activation-induced cell death (AICD). May also play a role in cognate interactions between T-cells and B-cells/macrophages.
