Monkey CD27L/CD70

Cat No.:	03-04-1326
Product Name:	Monkey CD27L/CD70
Description:	CD27L/CD70 is a TNF superfamily cytokine expressed on highly activated lymphocytes (like in T- and B-cell lymphomas). It is therefore suggested that anti-CD70 antibodies might be a possible treatment for CD70 positive lymphomas as normal lymphocytes do not express a lot of CD70. It binds to CD27 on T cells, and plays a role in T-cell activation,and nduces the proliferation of costimulated T-cells and enhances the generation of cytolytic T-cells.
Type:	Protein
Property:	Protein
Source:	HEK293
Genbank No.:	F7GPA5 (aa.57-189)
Applications:	WB,ELISA,Immunogen
Purity:	>95%
Storage:	Store at -80°C,Avoid freeze / thaw cycle.
Limitation:	For research use only,not for use in diagnostic procedures.
