

Monkey CTLA-4-hIgG1

Cat No.:	03-04-0069
Product Name:	Monkey CTLA-4-hIgG1
Description:	CTLA-4, a member of B7/CD28 superfamily, functions as an immune checkpoint, downregulates immune responses. CTLA-4 is constitutively expressed in Tregs but only upregulated in conventional T cells after activation. It acts as an
Type:	Protein
Property:	Protein
Source:	HEK293
Genbank No.:	Q9BDC4 (aa.43-152)
Applications:	WB, ELISA, Immunogen
Purity:	>95%
Storage:	Store at -80°C, Avoid freeze / thaw cycle.
Limitation:	For research use only, not for use in diagnostic procedures.
