

Human PDCD6-hIgG1

Cat No.:	03-04-0091
Product Name:	Human PDCD6-hIgG1
Description:	PDCD6(Programmed cell death protein 6)is a member of calcium-binding protein belonging to the penta-EF-hand protein family. Calcium binding is important for homodimerization and for conformational changes required for binding to other protein partners. This gene product participates in T cell receptor-, Fas-, and glucocorticoid-induced programmed cell death. In mice deficient for this gene product, however, apoptosis was not blocked suggesting this gene product is functionally redundant.
Type:	Protein
Property:	Protein
Source:	HEK293
Genbank No.:	O75340 (aa.23-191)
Applications:	WB,ELISA,Immunogen
Purity:	>95%
Storage:	Store at -80°C,Avoid freeze / thaw cycle.
Limitation:	For research use only,not for use in diagnostic procedures.
