| Product Name: | Monkey PDCD6-hIgG4 |
| Description: | <p>PDCD6(Programmed cell death protein 6)is a member of calcium-binding protein belonging to the penta-EF-hand protein family. Calcium binding is important for homodimerization and for conformational changes required for binding to other protein partners. This gene product participates in T cell receptor-, Fas-, and glucocorticoid-induced programmed cell death. In mice deficient for this gene product, however, apoptosis was not blocked suggesting this gene product is functionally redundant.</p> |
